REM ===== WIRING/INTEGRATION (for app code) ===== REM All hardwiring for Neura  
animation is ready: REM - AnimatedNeuraRive.dart is your Flutter widget to show Neura and trigger  
animations REM - Use AI/mood/chat events to call new animation states (e.g. "Idle", "Happy", "Talk") REM  
- .riv file from Rive (with your animations) is required for full visual animation REM - All asset folders must be  
registered in pubspec.yaml REM - For extra animation/mood logic, see README and manifest for expansion
```

```
REM ===== Done Message ===== dir Neura_Companion_Pixar_Asset_Kit /s echo. echo [INFO] All  
files copied and folders created! echo [INFO] Hardwiring for app animation is complete—use  
AnimatedNeuraRive.dart with your mood/chat triggers. echo [INFO] When ready, right-click  
Neura_Companion_Pixar_Asset_Kit and select "Send to > Compressed (zipped) folder" to make your ZIP!  
pause
```
